A crowd of nearly fifteen hundred people gathered and surrounded the cable car and the cab. The driver of the latter attempted to get away by driving through the crowd, but several men dragged him from his seat and handled him roughly. Mr. Steckler claimed that the Company was liable because of the fact that the injury was caused through the Company's negligence in having the gangplank pulled off before the passengers had alighted. Him to Suicide.

A Steady but Vain Opposition to the Found Dead in His Room This Morning-He, Was a Compositor

on "The World,"

Shortly after midnight this morning, Francis D. Daffin, of 28 Spencer place, Brooklyn, was found dead in a room in the Long Branch Hotel, in Sands street, opposite the bridge entrance in that city.

The gas from the two burners was turned on at full head, and it afterwards became evident that Daffin committed suicide. He was driven to desperation by the loss of about \$500 at the Brooklyn races yesterday.

Daffin was a printer by trade, and for the past four years has had a job in the composing-room of THE WORLD. Previous to that he lived in Baltimore and for seven years was foreman of the Baltimore Sun compos

He was forty-nine years old and lived with his wife and four children, the oldest of whom, F. D. Daffin, jr., was also in THE World composing-room, in a comfortable

whom, F. D. Daffin, jr., was also in The World composing-room, in a comfortable home on Spencer place.

Daffin had always been an enthusiast on the subject of horses, and had in a small way followed the races for years, putting up a little money on each important event.

Yesterday morning he drew the larger part of his money out of the bank and went down to the track at Gravesend. He felt so sure that Hanover would win that he put up every cent he had on the son of Hindoo.

People who saw him at the track say that he seemed to be perfectly sure of winning, and when the race was won by Exile he was so dazed that at first he could scarcely believe that he had lost his savings.

Instead of going home to supper as he usually did, the next that was heard of him was at the Long Branch Hotel, where he made his appearance about 7.30 o'clock last night and asked for a room.

There was nothing in his manner or speech at that time that indicated his intention of ending his life. He registered his name, and was assigned to a room on the third floor.

About midnight the call-boy, who had been sent upstairs, reported at the office that there was a very strong smell of gas in the upper hallway.

An investigation was made and the source of the escaping gas was located in Daffin's room. It was locked on the inside and the transom was closed. There was no response given to repeated knockings and the door was finally burst open.

The room was filled with gas and Daffin was found lying on the bed unconscious. A physician was hastily summoned, but all attempts to resuscitate him were fruitless, and the doctor, after a brief examination, pronounced him to be dead.

He was identified by papers found in his pockets and word was sent to his family. This morning his body was removed to his home and it will be taken to Baltimore for interment.

Coroner Levy Says There Was Undue Haste in the Operation.

The death of mind-reader W. Irving Our New Minister to Russia Suddenly Bishop, and the events which followed so rapidy are creating a sensation in town which bids fair to become greater ere it subsides.

Briefly retold, Bishop fell in a cataleptic fit after performing a feat of mind-reading never equalled about 2 a. M. in the Lamba' Club House.

He was put to bed there. Soon he lost all consciousness and appeared to be dead.

For five hours Dr. Irwin and another physician endeavored to resuscitate him. They failed to get a sign of life and concluded be

The body was removed to Hawk's undertaker's shop, at No. 8 Sixth avenue, where an autopsy was performed by Drs. Irwin, Ferguson and Vance.

Meantime the dead man's wife and mother had been telegraphed for to Philadelphia.

They came on and put up at the Hoffman House.

They came on and put up as the House.

They did not believe Bishop was dead.
They said he was only in a trance, as he had often been before.

When they heard of the autopsy, though, they became nearly crazy with grief.
They now accuse the doctors who held the post mortem of murdering their loved one in the interest of science.
The ladies declare that Mr. Bishop was subject to cataleptic fits, and that when attacged with one he usually went into a trance.

athered with one he usually went into a trance.

On one occasion he laid for two days before recovering. The shocking possibility that he may have been alive when he was being cut up, with all his powers of speech and movement paralyzed, but able to see and understand all that was going on, is breaking the hearts of the two women who loved him. Old Mrs. Bishop walks her room in the Hoffman House moaning: "They butchered my son. They murdered my dar ing. They had no right to cut that terrible gash in his brain. He was not dead: I feel it."

Young Mrs. Bishop is less violent, but just as intent on punishing, if possible, the men whom they think killed Mr. Bishop.

Laying aside the question whether Bishop was really dead or alive when the autopsy was performed, it is alleged that their hasty action was illegal anyhow, under section 309 of the Penal Code.

Dr. Cyrus Edson said to the reporter:

Mr. Rice's name appeared on the printed passenger list of the steamer, and nearly all of the other passengers supposed that he was to be their fellow-voyager.

Although he had inherited from his parents an ample fortune, Mr. Rice was an it defatigable and constant worker. His tireless in dustry kept pace with marked literary tastes, and he has contributed to all of the leading magazines and periodicals, his best known production being an introduction to "Reminiscences of Abraham Lincoln" and his contributions to "Ancient Cities of the World,"

He was always a stanch Republican in politics, and belonged to the political reform class of writers. In 1876 be purchased the North American Review, and he brought it out of its decline and up to the very front rank as a distinctively American magazine of thought.

thought.

As an exponent of thorough-going Americanism the Review is accepted as the authority abroad, and Mr. Rice succeeded in enlisting among its contributors the greatest of the statesmen and thinkers of the United States. In 1879 Mr. Rice organized an expedition to investigate among the ruins of ancient

The expedition was known as the Charnay expedition, which was sent under the auspices of the American and French Governments. Casts of the most ancient and interesting of

Casts of the most ancient and interesting of the ruined architecture were made and are now in the Trocadero, Paris, and duplicates are soon to be exhibited in Washington.

Mr. Rice's literary ventures extended to Paris, where, in 1884, he purchased the periodical Le Matin.

But all of these were side ventures as com-pared to his constant efforts as a reformer of the political methods of his native land, and when, in 1886 he was nominated for Conpared to his constant efforts as a reformer of the political methods of his native land, and when, in 1886, he was nominated for Congress in the Tenth District of this city against Gen. Francis B. Spinola, there was a strong tide in his favor, and though the nomination came very tardily, leaving only three working days before election, he was defeated by only 527 votes in a district which usually gives 8,000 Democratic majority.

Then Mr. Rice, believing that his defeat was the result of the trickery of the "machine" politicians of his own party, led by Capt. Michael Cregan, of the Sixteenth Assembly District, proceeded with characteristic energy to bring them to justice.

He began with Capt. Cregan before the Central Committee of the County Committee, and attempted to prove that \$8,000 placed by him in the hands of Cregan to be used as he throught best, had either not been used at all or else had gone into the pocket of the shrewd politician.

Unsuccessful in that year, Mr. Rice again prosecuted his fight in 1837 and a succeeded in obtaining the expulsion of Capt. Cregan for his leadership and from the County Committee and the doughty Captain, broken hearted, retired from politics and died a few months later.

Mr. Rice always insisted that his prosecu-

Mr. Rice always insisted that his prosecution of Capt. Cregan was in no wise due to any personal animosity, but was actuated by a desire for the purification of our elections, and he followed it by dratting a ballot reform bill which directed public attention to the subject, and was the beginning of the agitation which resulted in the Saxton bill, based upon the Australian ballot system.

On March 27 President Harrison nominated Mr. Rice to be Envey Extraordinary and Minister Plenipotentiary to Russia, and his nomination see immediately confirmed by the Senate.
